## ----- Pool Closing -----

### POOL CLOSING CONSISTS OF:

1. Draining water down to appropriate level (if applicable).
2. Taking plugs out of pump & filter.
3. Taking plugs out of skimmer.
4. Vacuuming pool (if more than once is not enough to thoroughly clean it will be an added charge).
5. Excessive leaves or debris removal will be an extra charge.
6. Take water sample and test it (testing done at store location only).
7. Add needed chemicals to balance water.
8. Add chemicals to winterize pool.
9. Put cover on pool.

### CUSTOMER RESPONSIBLE FOR:

1. Bring water sample to store at least two days before closing of pool, otherwise the additional charge for a water test will apply.
2. Have cover & water bags out on deck (if applicable).
3. Have pool clear and clean. If pool is cloudy and/or green the price of closing will increase due to extra labor and chemicals to balance and clear pool.
4. Providing all electrical outlets needed to do closing
